

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-32 (canceled).

33 (new). A calendar-based photo file browsing system for browsing a plurality of files including at least one of a digital image or a digital video, each said digital file having an associated date, said system having an interface displayed on a display, said interface comprising:

- (a) a calendar portion having a range of displayed dates, each respective said date containing an indicator indicating the existence of one or more files associated with said respective said date; and
- (b) a browsing portion permitting a user to selectively increment said range by a selected one of a day and a month.

34 (new). The system of claim 33 where said browsing portion permits a user to selectively increment said range by a selected one of a day, a month, and a year.

35 (new) The system of claim 33 where said browsing portion permits a user to adjust the size of said range.

36 (new). The system of claim 35 where said browsing portion permits a user to alternate said range between a week and a month.

37 (new). The system of claim 33 where said indicator is a thumbnail image.

38 (new). The system of claim 37 where said thumbnail image is representative of a plurality of images, each associated with the respective indicator's date.

39 (new). The system of claim 33 where each respective displayed date has an associated displayed second indicator indicating the quantity of files associated with said respective displayed date.

40 (new). The system of claim 33 having plural said indicators.

41 (new). The system of claim 40 where each of said plural indicators of a respective said date indicates a category of files.

42 (new). The system of claim 40 where each of said plural indicators of a respective date indicates a time associated with said respective date relative to other said indicators associated with said respective date.

43 (new). A calendar-based photo file browsing system for browsing a plurality of files including at least one of a digital image or a digital video, each said digital file having an associated date, said system having an interface displayed on a display, said interface comprising:

- (a) a calendar portion having a range of displayed dates, each respective said date containing an indicator indicating the existence of one or more files associated with said respective said date; and
- (b) said indicator being a thumbnail image of a file associated with said respective said date.

44 (new). The system of claim 43 where said thumbnail image is representative of a plurality of images, each associated with the respective indicator's date.

45 (new) The system of claim 43 having a browsing portion permitting a user to selectively increment said range by a selected one of a day and a month

46 (new) The system of claim 45 where said browsing portion permits a user to adjust the size of said range.

47 (new). The system of claim 46 where said browsing portion permits a user to alternate said range between a week and a month.

48 (new). The system of claim 45 where said browsing portion permits a user to selectively increment said range by a selected one of a day, a month, and a year.

49 (new). The system of claim 43 where each respective displayed date has an associated displayed second indicator indicating the quantity of files associated with said respective displayed date.

50 (new). The system of claim 43 having plural said indicators.

51 (new). The system of claim 50 where each of said plural indicators of a respective said date indicates a category of files.

52 (new). The system of claim 50 where each of said plural indicators of a respective date indicates a time associated with said respective date relative to other said indicators associated with said respective date.
